

## High Temperature Flexible Ducting - 450°C

Exhaust gas hose for temperatures up to +450°C, two layers

#### Material

- 1 clip profile spiral: hot-dip galvanised steel band
- 2 wall: double-layered, inner layer with heat resistant impregnated glass fabric and outer layer with special-coated high-temperature fabric reinforced with integrated VA wire

#### Applications

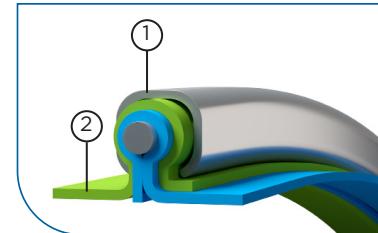

- diesel engine test-benches with higher extraction performance
- hot air conveyance
- engine manufacturing
- exhaust gas extraction
- machine manufacturing
- automotive manufacturing
- low pressure range
- smoke extractors
- defence systems
- aircraft manufacturing

#### Properties

- extremely flexible
- hardly inflammable
- very good temperature resistance
- primarily suitable as exhaust hose
- increased vacuum resistance via integrated reinforcement components
- outer chafing protection spiral
- small bending radius
- withstands high mechanical loads
- super lightweight
- abrasion-resistant
- high tension-proof connection of wall-lining and spiral via special clamp mechanism

#### Temperature Range

- -20°C to +450°C for vacuum applications
- peaks to +500°C
